SUMMARY

Results-driven web developer who enjoys developing beautiful, functional, and clean web applications, with a focus on front end and UX/UI. My history in the healthcare industry inspires my development to be accessible to all. Looking for a dynamic and creative work environment where I can continue to grow my skills and collaborate with fellow developers.

SKILLS

HTML | CSS | Bootstrap | Responsive Design | Component Library | Angular | JavaScript | jQuery | .NET C# | Git | GitHub | Bitbucket | JSON | RESTful APIs | SQL Server Management Studio | Microsoft Azure DevOps

EXPERIENCE

Relias October 2018 - Present

Full Stack Developer

- Works with a SCRUM team to develop technical solutions for an e-learning platform.
- Stack includes primarily Angular, C# .NET, and SQL.
- Collaborated to develop the platform's first component library intended to be used with the Angular portion of the app
- Collaborated with Systems Management to design and create Build and Release Pipelines in Microsoft Azure to automate platform release process
- Currently promoting a team focused on creating a platform-wide design system to encourage accessibility-focused and mobile-responsive design, as well as a consistent style throughout the application

The Coding Bootcamp at UNC Chapel Hill 2018

Teaching Assistant

- Provided in-person and online assistance to students in this MERN-stack program, an intensive, six-month program dedicated to designing and building web applications
- Graded homework and projects, and provided constructive feedback on development best practices

EDUCATION

University of North Carolina-Chapel Hill UNC Coding Boot Camp – Full Stack Web Development 2018

East Carolina University M.S. Communication Sciences and Disorders 2013

University of North Carolina-Chapel Hill B.A. Communication Studies with a second major in Linguistics 2011
